Concrete Sample at site

Project site – C Square

Project Description

C Square Healthcare Pvt. Ltd, a cancer treatment center for which a radiation shield closed room needed to be designed.

Challenges

Numerous challenges such as thermal cracks during mass concrete, heavy & congested reinforcement

Solution

RMC Readymix (India) team visited the site and understood the problem and recommended a solution of Thermocrete® and Easycrete®. This combination gives superior quality, better workability, better surface finish and quick execution. About 892cum of Thermocrete® & Easycrete® was completed in a span of 3 months. This combination was very effective in reducing shrinkage cracks & honeycombing, thus increasing the
