

Case Study on FRCcrete®

Volume supplied	72 cum
Area of application	Roof Slab
Solution	FRCcrete®
Location	Goa

Project Description

Commercial building project in heart of city and build with almost care of quality aspect and durability.

Challenges

Goa is located on coastal belt having higher wind flow toward its coast and high temperature during day time, plastic shrinkages do occur occasionally. Avoiding plastic shrinkage crack and getting uniform smooth surface were one of the primary requirements of builder.

Solution

When we approach and heard them, we recommended them solution to cast slab with FRCcrete®.

FRCcrete® having strong property of reducing plastic shrinkage cracks, increase durability by giving toughness, flexure and abrasion resistance. Improve rheology of concrete thereby giving smooth finish.
