

Thermal Insulation through Elitecrete™

Volume supplied	494cum
Area of application	Roof Slab
Solution	Elitecrete™
Location	Indore
Duration	1 month

Project Description

The project was at an institutional Building (G+5) at Super Corridor, Indore developed by Tata Projects Limited.

Developer – Tata Projects Ltd.

Challenges

Client wanted to reduce the temperature at upper floors by not increasing the dead load of the structure.

Client was also not satisfied with services and qualities of other RMC's.

Solution

RMC (India) Sales team recommended **Elitecrete™** as a solution for the aforesaid challenges due to following reasons.

4" thick layer of Elitecrete™ over a roof slab will help in energy savings and will also significantly reduce the dead load. Thus giving, excellent thermal and sound insulation.

With the project completed, the client was happy with the performance of Elitecrete™

Few glimpses of the execution of Elitecrete™
